better education outcome

SYNMAN Compact

Torso Model

for ATLS Team Training

SYNMAN Compact Torso Model for trauma education

SYNMAN Compact Torso Model is the perfect manikin for the ATLS Team Training. It was designed in cooperation with ATLS Switzerland and was officially acknowledged in 2012 by the ACS/ATLS. It is an ideal alternative to existing models and to using animals for the surgical skill stations in acute trauma life support courses.

The torso is re-usable and all replacement parts may be easily replaced without the need for additional tools.

With the **SYNMAN Compact Torso Model** the following training procedures can be performed:

- Cricothyroidotomy
- Needle thoracocentesis
- Chest tube insertion

The **SYNMAN Compact Torso Model** is equipped with simulated organs.

The **SYNMAN Compact Torso Model** is set up and ready to use in less than 5 minutes without additional tools.

There is no need to return replacement parts after use.

The **SYNMAN Compact Torso Model** eliminates the use of animals.

The **SYNMAN Compact Case** with attachable wheels allows easy transportation.

No power connection is required.

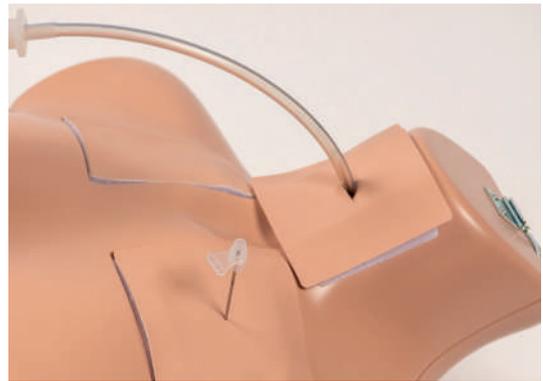

Training procedures

Cricothyroidotomy

Great anatomical design and excellent performance

Needle Thoracentesis

The ribs and clavicle must be palpated for correct entry point

Chest Tube Insertion

Very realistic with lung feature, multiple foam layers and correct rib separation

Solid travel case

provides compact storage and safe transport

SYNMAN Compact is set up and ready to use in less than 5 minutes

Replacement parts can be quickly and easily changed without the use of tools. Available in sets for 8, 16 or 20 participants

Experts voices

The **SYNMAN Compact Torso Model** is being used throughout the world. You will find them in Switzerland, Germany, Italy, Portugal, India, Singapore, USA and many other countries. Our customers are ATLS Centers, Military Facilities, Hospitals and Universities.

«The preparation of the SYNMAN Compact Torso Models, is much easier than in the past when we used animals. Within 5 minutes the models are ready, we can start the skills session, and we do not need special rooms. It really guarantees easy handling and preparation.»

Maria Lampi, National ATLS Coordinator,
National ATLS Coordinator Sweden

With the **SYNMAN Compact Torso Model** everything you need can be performed on a single model.

The **SYNMAN Compact Torso Model** is easy to clean and will not develop mold or mildew.

The **SYNMAN Compact Case** provides compact storage and safe transportation.

The **SYNMAN Compact Torso Model** keeps the participants costs low and no expensive investment is needed.

«My favourite exercise is the chest tube insertion because it is very close to reality. The students can use the instruments and the force feedback they get from the rib and the muscles is very close to real life..»

Dr. Thomas Beck,
Hospital Overwallis,
ATLS Instructor Switzerland

Replacement parts set
